Overview:

Chartwell Resource Group Ltd. is looking for a full-time **GIS Technician** who is motivated, positive, and dependable. The position is based out of our North Vancouver office. We are seeking an outstanding individual to join our team of GIS, Software, and Resource Professionals. Our mission is to provide the highest calibre of service to meet the needs of our clients, and we are only as good as the people on our team.

What We Offer:

- Tailored career growth opportunities within a team environment that recognizes talent
- A competitive wage and comprehensive benefits package along with a bonus program
- A wide variety of work with a multitude of clients
- A fun, professional and safety-first work environment
- Flexible work arrangements ensuring work life integration

Job Description:

As a GIS Technician at Chartwell, you will be responsible for creating, modifying, maintaining, displaying and troubleshooting GIS maps and databases for Natural Resource and Utilities-based projects. This role involves working closely with staff and clients to complete a variety of GIS tasks to meet client deliverables. You will work as part of a team of GIS professionals on a variety of projects, leveraging your GIS expertise and client interaction skills. A key aspect of this position is your eagerness to learn, adapt, and innovate in a collaborative and fast-paced environment.

Job Responsibilities:

The position's responsibilities will generally include:

- Spatial data management
- Developing and delivering on operational mapping projects with tight timelines
- Managing incoming field collected data from clients and staff
- Converting, importing, managing, and manipulating data from a variety of sources
- Performing QA/QC tasks to ensure GIS data integrity
- Using Python, SQL, or other scripting language to perform tasks
- Maintenance and development of GIS infrastructure
- Troubleshooting issues related to GIS and web-based mapping systems

Qualifications:

- A minimum of one year of GIS experience working on natural resource-based mapping projects
- Formal education in GIS with a background in Forestry, Geography or Computer Science
- Experience using Esri, QGIS, and mobile products for data collection and mapping
- Experience leveraging map series or other methods for automated map production
- Experience programming and scripting using Python, SQL, or Arcade
- Excellent data management and cartographic skills
- Strong reasoning and troubleshooting abilities with attention to detail
- Excellent oral and written communication skills with attention to customer service
- Canadian citizenship or legally qualified to work in Canada

Compensation:

- The hourly range is between $28-$33 and will be commensurate with experience.

Application:

If you are interested in working with us, please forward your resume with cover letter to GISteam@crgl.ca. Applications will be accepted until the position is filled. We look forward to hearing from you!

Only those selected for an interview will be contacted. We thank all applicants for their interest.
