

Chartwell Resource Group Ltd. is a consulting firm specializing in services and solutions for the resource sector. With tightly integrated Engineering, Forestry, GIS, and Biology departments, Chartwell has a close-knit team, a diverse client base, and a reputation for outstanding quality and service. Our Head Office is located in North Vancouver, with additional offices in Squamish, Chilliwack, and Sechelt.

Overview:

Chartwell Resource Group Ltd. is looking for a full-time **Database Administrator** who is motivated, positive, and dependable. The position is based out of our North Vancouver office. We are seeking an outstanding individual to join our team of GIS, Software, and Resource Professionals. Our mission is to provide the highest calibre of service to meet the needs of our clients, and we are only as good as the people on our team.

What We Offer:

- Tailored career growth opportunities within a team environment that recognizes talent
- A competitive wage, comprehensive benefits package along with a bonus program
- A diverse range of work with a multitude of clients
- A fun, professional and safety-first work environment
- Flexible work arrangements ensuring work life integration

Job Description:

As a DBA at Chartwell, you will be developing and maintaining our PostgreSQL database and back-end systems that underpin the applications and services we develop for our staff and clients. You will be working as part of a small team of software and GIS developers on a variety of projects, bringing a combination of skills from database admin, Linux system admin, and data science, combined with an eagerness to learn and innovate.

Job Responsibilities:

The position's responsibilities will generally include:

- Database creation, management, and schema design
- Database optimization and performance tuning
- Writing SQL functions and triggers, as well as Python and bash scripts, to manage systems and data
- Developing a robust monitoring and alerting system to minimise downtime and maintain data integrity
- Linux server updates and system maintenance
- Data ETL, management, and analysis

Qualifications:

- Formal education in Computer Science or related discipline
- 3 to 5 years of recent experience as a DBA or systems administrator
- Proficient in database development and software management
- Strong relational database and SQL experience, primarily with PostgreSQL
- Experience with Linux system administration
- Experience with geospatial databases (e.g. Esri SDE, PostGIS) will be considered a big asset
- AWS experience would be a nice to have
- Analytical and problem-solving skills with attention to detail
- Ability to multitask, prioritize work, and manage time efficiently
- Excellent data management skills
- Canadian citizenship or legally qualified to work in Canada

Compensation:

- The hourly range is between \$36-\$42 and will be commensurate with experience.

Application:

If you are interested in working with us, please forward your resume with cover letter to GISteam@crgl.ca. Applications will be accepted until the position is filled. We look forward to hearing from you!

We thank all applicants for their interest; however, only those selected for an interview will be contacted.
